These clips can be arranged into scenes which can then be triggered as a unit For instance a drum, bass and guitar track might comprise a single scene.. [4]Features[edit]Views[edit]Live's user interface is composed of two 'Views' – the Arrangement View and the Session View.. The Session View offers a grid-based representation of all of the Clips in a Live Set.. It is also used by DJs, as it offers a suite of controls for beatmatching, crossfading, and other different effects used by turntablists, and was one of the first music applications to automatically beatmatch songs.. When moving on to the next scene, which may feature a synth bassline, the artist will trigger the scene, activating the clips for that scene. [Download Google Remote Desktop For Mac](#)
